

WHEN, IF EVER, CAN ASSESSMENT FOSTER EQUITY?

WEDNESDAY, OCTOBER 30

Lecture: 4 pm Wisconsin Idea Room

**Reception: 5 pm Morgridge Commons
Education Building**

LORRIE SHEPARD

**University Distinguished Professor & Dean Emerita
School of Education, University of Colorado Boulder**

Lorrie Shepard's research focuses on psychometrics and the use and misuse of tests in educational settings. Her technical work has contributed to validity theory, standard setting, and statistical models for detecting test bias. Her research studies on test use have addressed the identification of learning disabilities, testing for kindergarten readiness testing, teacher testing, effects of high-stakes accountability testing, and most recently the use of classroom assessment to support teaching and learning.

Hosted by the UW–Madison School of Education and its Departments of Curriculum & Instruction and Educational Psychology, with support from the Sorenson endowment, Center for Research on Early Childhood Education.
