

The CRECE Undergraduate Research Fellows Program

The Center for Research on Early Childhood Education (CRECE) invites applications for a new undergraduate research fellowship program funded through a generous contribution from Sue and George Krug and UW 2030. The program's goal is to diversify the research communities that address early childhood education issues. We hope to do this by providing mentored research experiences to traditionally underrepresented and other minoritized undergraduate students. CRECE's work focuses on children ages 0-8, their families, caregivers, teachers, and communities. Fellows will work with both faculty and graduate students on current CRECE research projects.

In these fellowships, students will experience:

- active engagement in a CRECE research project from September 7, 2022 - May 5, 2023
- mentoring by a faculty member and a graduate student
- participation in a weekly workshop
- a culminating project report during the fellowship period
- an hourly stipend of \$13.50/hr based on an agreed-upon time commitment
- one research credit per semester

We will consider applicants who meet one or more of the following criteria:

- From a racial/ethnic minority group: African-American, Latino/Hispanic, Native Alaskan or Native Pacific Islander, Native American, Southeast Asian (Cambodian, Hmong, Laotian, or Vietnamese, admitted to the US after 12/31/1975), Biracial/Multiracial
- From a low-income household
- First in their family to attend college
- Have a documented disability
- Have completed their sophomore or junior year.

Interested in becoming a CRECE Undergraduate Research Fellow? Please contact Beth Graue (beth.graue@wisc.edu) with questions and/or complete an application here:
