

The CRECE Masters' Research Internship

The Center for Research on Early Childhood Education (CRECE) invites applications for a Masters' research internship funded through a generous contribution from Sue and George Krug. The program's goal is to diversify the research communities that address early childhood education issues. We hope to do this by providing mentored research experiences to traditionally underrepresented and other minoritized Masters' students. CRECE's work focuses on children ages 0-8, their families, caregivers, teachers, and communities. Interns will work with both faculty and PhD students on current CRECE research projects.

In these internships, students will experience:

- active engagement in a CRECE research project from August 27, 2023 - May 3, 2024
- mentoring by a faculty member a PhD student
- a stipend of \$27.30/hr based on an agreed-upon time commitment
- one research credit per semester

We will consider applicants who meet one or more of the following criteria:

- From a racial/ethnic minority group: African-American, Latino/Hispanic, Native Alaskan or Native Pacific Islander, Native American, Southeast Asian (Cambodian, Hmong, Laotian, or Vietnamese, admitted to the US after 12/31/1975), Biracial/Multiracial
- From a low-income household
- First in their family to attend college
- Have a documented disability

Interested in becoming a CRECE Undergraduate Research Intern? Please contact Amy Claessens (claessens@wisc.edu) with questions and/or complete an application here: [CRECE Masters' Research Internship Application](#).

Applications for the 2023-24 academic year are due by August 15, 2023.
